5100 LOGISTICS SECTION ORGANIZATION

The Logistics Section is responsible for providing facilities, all services and materials needed for the incident. The Incident Commander will determine the need to establish a Logistics Section on the incident. This is usually determined by the size of the incident, complexity of support, and how long the incident may last. Once the IC determines that there is a need to establish a separate Logistics function, an individual will be assigned as the Logistics Section Chief.

Six functional units can be established within the Logistics Section. If necessary, a two-branch structure can be used to facilitate span of control. The titles of the units are self descriptive. Not all of the units may be required, and they will be established based upon need. Branches and Units in the Logistics Section are shown in Figure 5000-A.

**LOGISITCS SECTION DIAGRAM
FIGURE 5000-A**

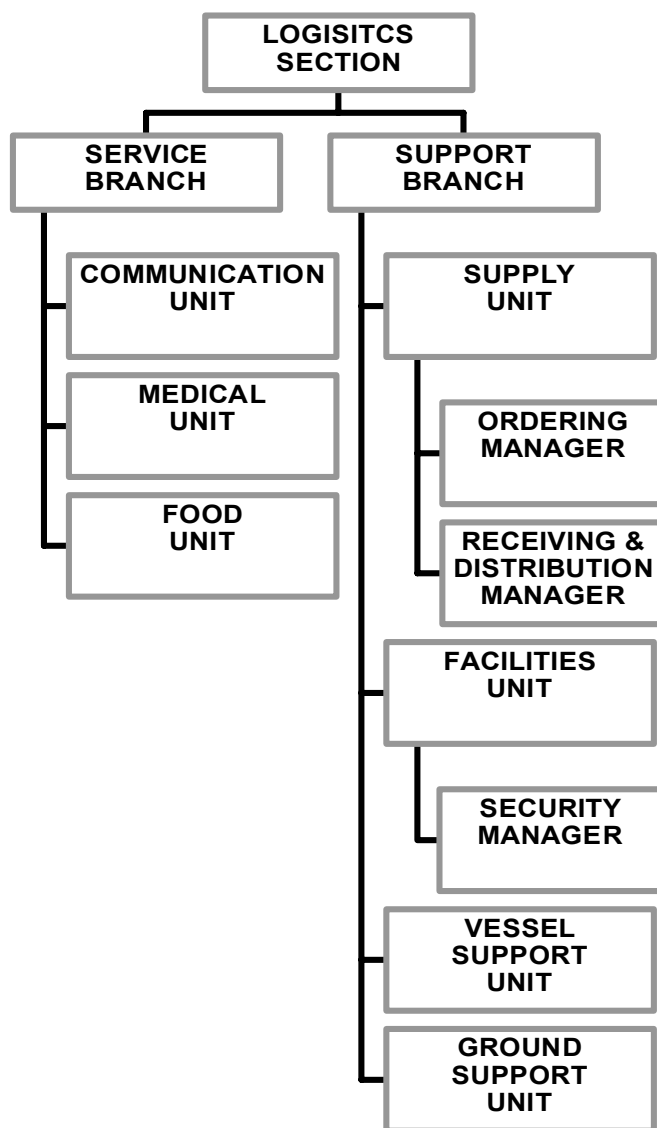

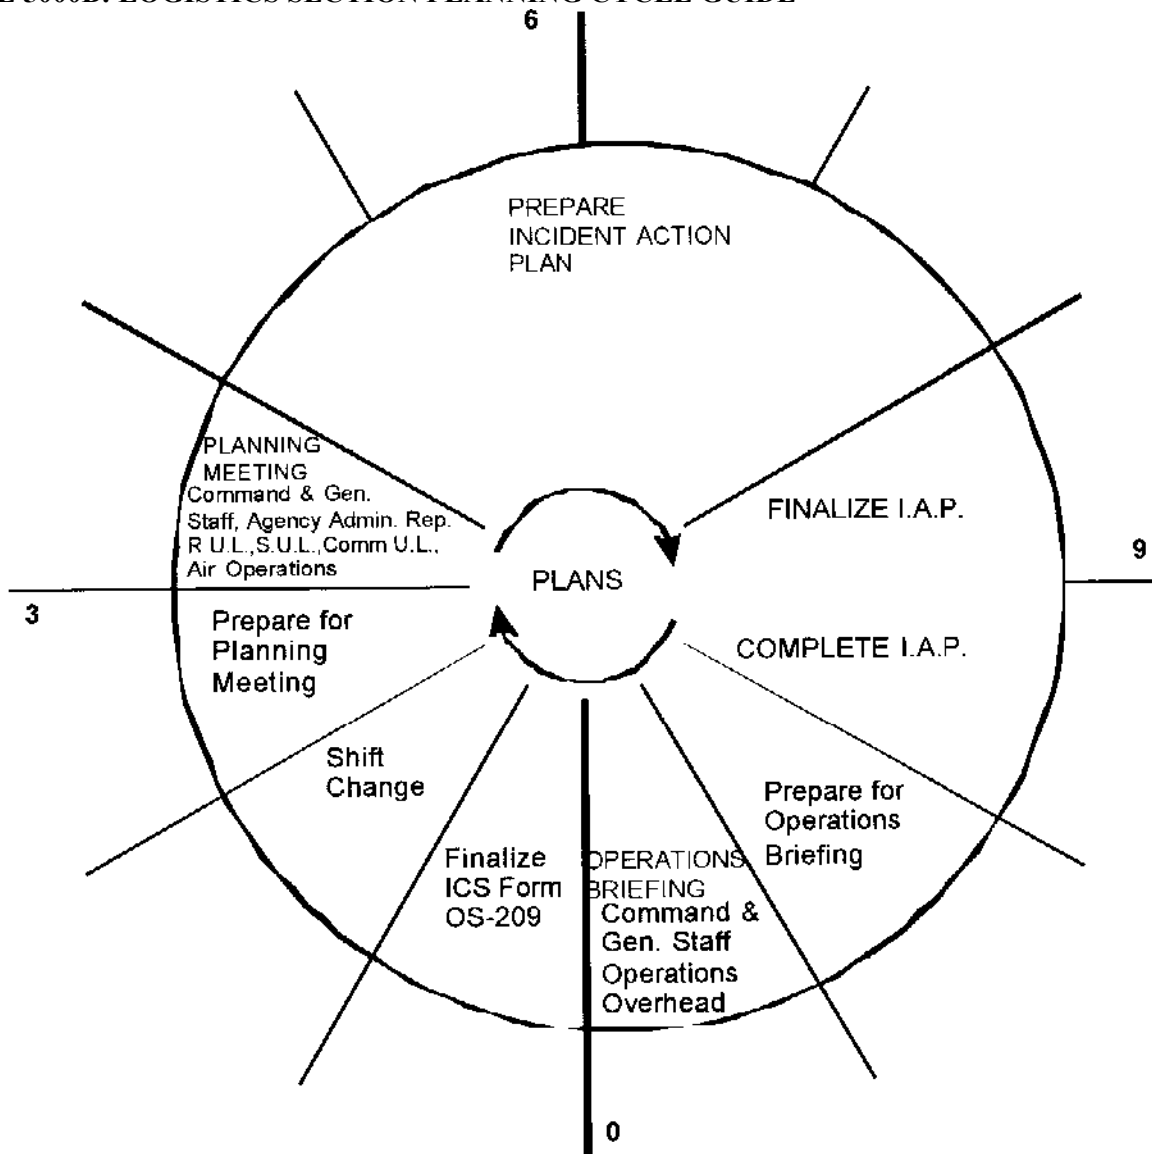

FIGURE 5000B: LOGISTICS SECTION PLANNING CYCLE GUIDE

Based on a 12 hour operational period, may be modified based on actual duration of operational period (e.g. 24, 36, etc.)

ABBREVIATIONS & ACRONYMS

Agency Admin Rep:	Agency Administrator Representative
Bus. Mgmt:	Business Management
Comm. U.L.:	Communications Unit Leader
Finance/Admin:	Finance/Administration
R.U.L.:	Resources Unit Leader
S.U.L.:	Situation Unit Leader
Supply & Demob. U.L.	Supply & Demobilization Unit Leader

5200 ROLES AND RESPONSIBILITIES

5210 Logistics Section Chief

The Logistics Section Chief, a member of the General Staff, is responsible for providing facilities, services, and material in support of the incident. The Logistics Section Chief participates in development and implementation of the Incident Action Plan and activates and supervises Branches and Units within the Logistics Section.

Refer to the Field Operations Guide (FOG) for position responsibilities.

5220 Service Branch / Director

The Service Branch Director, when activated, is under the supervision of the Logistics Section Chief, and is responsible for the management of all service activities at the incident. The Branch Director supervises the operations of the Communications, Medical, and Food Units.

Refer to the Field Operations Guide (FOG) for position responsibilities.

5221 Communication Unit / Leader

The Communications Unit Leader, under the direction of the Service Branch Director or Logistics Section Chief is responsible for developing plans for the effective use of incident communications equipment and facilities; installing and testing of communications equipment; supervision of the incident Communications Center; distribution of communications equipment to incident personnel; and the maintenance and repair of communications equipment.

Refer to the Field Operations Guide (FOG) for position responsibilities.

5222 Medical Unit / Leader

The Medical Unit Leader, under the direction of the Service Branch Director or Logistics Section Chief, is primarily responsible for the development of the Medical Emergency Plan, obtaining medical aid and transportation for injured and ill incident personnel, and preparation of reports and records. The Medical Unit may also assist Operations in supplying medical care and assistance to civilian casualties at the incident, but is not intended to provide medical services to the public.

Refer to the Field Operations Guide (FOG) for position responsibilities.

5223 Food Unit / Leader

The Food Unit Leader, under the direction of the Service Branch Director or Logistics Section Chief, is responsible for determining feeding requirements at all incident facilities; menu planning; determining cooking facilities required; food preparation; serving; providing potable water; and general maintenance of the food service areas.

Refer to the Field Operations Guide (FOG) for position responsibilities.

5230 Support Branch / Director

The Support Branch Director, when activated, is under the direction of the Logistics Section Chief, and is responsible for development and implementation of logistics plans in support of the Incident Action Plan, including providing personnel, equipment, facilities, and supplies to support incident operations. The Support Branch Director supervises the operation of the Supply, Facilities, Ground Support and Vessel Support Units.

Refer to the Field Operations Guide (FOG) for position responsibilities.

5231 Supply Unit / Leader

The Supply Unit Leader is primarily responsible for ordering personnel, equipment and supplies; receiving, and storing all supplies for the incident; maintaining an inventory of supplies; and servicing non-expendable supplies and equipment.

Refer to the Field Operations Guide (FOG) for position responsibilities.

5231.1 Ordering Manager

The Ordering Manager is responsible for placing all orders for supplies and equipment for the incident. The Ordering Manager reports to the Supply Unit Leader.

Refer to the Field Operations Guide (FOG) for position responsibilities.

5231.2 Receiving & Distribution Manager

The Receiving and Distribution Manager is responsible for receiving and distribution of all supplies and equipment (other than primary resources) and the service and repair of tools and equipment. The Receiving and Distribution Manager reports to the Supply Unit Leader.

Refer to the Field Operations Guide (FOG) for position responsibilities.

5232 Facilities Unit / Leader

The Facilities Unit Leader is primarily responsible for the layout and activation of incident facilities (e.g. Base, Camp(s) and Incident Command Post). The Facilities Unit provides sleeping and sanitation facilities for incident personnel and manages base and camp operations. Each facility (base or camp) is assigned a manager who reports to the Facilities Unit Leader and is responsible for managing the operation of the facility. The basic functions or activities of the Base and Camp Manager are to provide security service and general maintenance. The Facility Unit Leader reports to the Support Branch Director.

Refer to the Field Operations Guide (FOG) for position responsibilities.

5232.1 Security Unit / Manager

The Security Unit Manager is responsible to provide safeguards needed to protect personnel and property from loss or damage.

Refer to the Field Operations Guide (FOG) for position responsibilities.

5233 Vessel Support Unit / Leader

The Vessel Support Unit Leader is responsible for implementing the Vessel Routing Plan for the incident and coordinating transportation on the water and between shore resources. Since most vessels will be supported by their own infrastructure, the Vessel Support Unit may be requested to arrange fueling, maintenance and repair of vessels on a case by case basis.

Refer to the Field Operations Guide (FOG) for position responsibilities.

5234 Ground Support Unit / Leader

The Ground Support Unit Leader is primarily responsible for 1) support out of service resources 2) coordination of transportation of personnel, supplies, food, and equipment, 3) fueling, service, maintenance and repair of vehicles and other ground support equipment, and 4) implementing the Traffic Plan for the incident.

Refer to the Field Operations Guide (FOG) for position responsibilities.

5300 COMMUNICATIONS

This section establishes which radio frequencies will be used for inter-agency communication in an oil spill response. Most of the frequencies are within the marine band of the VHF-FM spectrum. A secondary purpose is to identify the operating frequencies used by principal federal, state, and local agencies, and provide an overview of those agencies' capabilities and resources.

Implementation of this plan will be a slow process. No party involved in the response should expect communications to be established immediately. All aspects of this plan can be expected to be in place within the first two days.

5310 Unified Command Calling and Coordination Frequencies:

VHF-FM Channel 81A (157.075Mhz) is the frequency for ground communication between the Unified Command and USCG units on-scene. It is also the secondary frequency for communication between the Unified Command and on-scene units from OSPR, U.S. Fish & Wildlife, local agencies, and Pacific Affiliates.

Figure 5000-C

VHF-FM	Freq.	Use	Remarks
6	156.3	Safety Freq.	Also Gru San Fran Secondary Public Liaison
12	156.6	Intership safety	Also VTS San Fran OffshoreSector
13	156.65	Bridge to Bridge	
14	156.7	VTS San Fran Inshore Sector	
16	156.8	International Calling and Distress	Only for hailing and distress
21A	157.05	Gru San Fran Primary, Gru Humboldt Bay Secondary	
22A	157.1	USCG Only, Public Liaison, Safety Bcsts	
23A	157.05	Sta Monterey Primary	
81A	157.075	Unified Command Primary	
83A	157.175	Group Humboldt Bay Primary	OSPR wardens can use this freq.
CLEMAR		US Fish & Wildlife, OSPR & Ca. Local Govt. Primary	Ca. and Fed. Govt. only freq.
CALCORD		Ca. Local Govt. Secondary	Ca. and Fed. Govt. only
VHF	150.98	MSRC Primary	Not a Marine Band frequency
UHF	381.8	CG Aircraft Primary	
UHF	454.0	Clean Bay Primary	Clean Bay also can assign VHF-FM freqs as required for working/liaison
UHF	459	Clean Bay Secondary	

The primary frequency for communication between the Unified Command and OSPR, U.S. Fish & Wildlife, local agencies, and Pacific Affiliates during the initial phase of the response is CLEMAR, but is expected to shift at some point to CALCORD as additional organizations join the MAC.

5311 Unified Command/Responsible Party Calling and Coordination Frequency:

Due to the range of different possible responsible parties, it is impossible to predesignate a frequency for this purpose which would work in all cases. Therefore, as early as possible in a response, the communications unit and RP should make contact by landline and choose a frequency accessible to both parties.

The UHF frequency 150.980Mhz is used by Marine Spill Response Corporation, while UHF frequency 454(Tx)/459(Rx) is used by Clean Bay cooperative. In the absence of direct communications with the RP, federal & state authorities might use these frequencies and communication with these parties as an interim measure.

5312 U.S. Coast Guard working frequencies:

Channel 81A (157.075Mhz): communication between U.S. Coast Guard units and other Coast Guard personnel who are part of the OSC staff.

UHF 381.8: the primary working frequency between the Unified Command and U.S. Coast Guard aircraft.

Channel 21A: primary working/SAR frequency of Group Humboldt Bay.

Channel 83A: primary working/SAR frequency of Group Humboldt Bay.

Channel 16 - (156.8Mhz) Designated under international convention for use for ship-to-ship and ship-to-shore hailing and distress in international waters. ALL users are required to use channel 16 for only these purposes and then switch to other channels for subsequent communications. Oil spill response is no exception.

Channel 13 - (156.65Mhz) Designated bridge-to-bridge hailing and navigation safety frequency in inland and offshore waters. It may be used only to establish contact and make arrangements between vessels in crossing, meeting, or overtaking situations in accordance with the International or Inland Navigation Rules.

Safety Frequency: Ch. 06 (156.3Mhz) is designated as the frequency which may be used by all parties for communication on matters involving human health and safety. FCC regulations require all vessels equipped with VHF-FM capability to have this channel. As there is expected to be little other traffic on this channel during an oil spill response, this should be monitored by all involved units that have this channel available, and regarded as a tertiary channel for the response.

5313 CA Office of Oil Spill Prevention and Response (OSPR) working frequency: In central and northern California, OSPR wardens' and biologists' working frequencies are 159.435Mhz(Tx) and 151.415Mhz (Rx). However, OSPR wardens have handheld radios with VHF channel 83A, and this may be the best way to establish and maintain contact between them and CG first responders during the initial stages of a spill response.

5314 County OES and local government agency operating frequencies: County OES's and local government agencies such as police, fire, county sheriffs, and environmental health departments have frequencies and communications systems established within their counties. It is not the intent of this plan to interfere with or change those established systems. The primary frequency during the initial response is CLEMAR, but is expected to shift at some point to CALCORD as additional organizations join the MAC. Either frequency will be used for coordination among those agencies and between those agencies and the Unified Command.

5315 Intra-agency and Intra-company communications: It is expected that each government agency and private company involved in the response operation will continue to use its own normal working frequency(s) for internal communication.

Alternate oil spill containment and cleanup frequencies: 47 CFR Part 90.65 designates the four primary VHF-FM frequencies and two primary UHF-FM frequencies listed below for use in oil spill containment and cleanup operations.

- (1) 150.980Mhz VHF-FM*
- (2) 154.585Mhz VHF-FM
- (3) 158.445Mhz VHF-FM
- (4) 159.480Mhz VHF-FM
- (5) 454.000Mhz UHF*
- (6) 459.000Mhz UHF*

*as noted in Figure 5000-C, these are the primary operating frequencies used by Marine Spill Response Corporation and Clean Bay coop, respectively.

5320 Coast Guard Communications Capabilities:

The MSO has a Contingency Communications Kit in reserve for an oil spill response. The kit consists of a portable VHF repeater system, 2 portable VHF base stations and a cache of VHF handheld radios. The equipment in the kit will provide adequate communication capabilities for initial responders. All VHF radios are tuned to the frequencies within the marine band.

The Coast Guard has a system of high sites along the coast designed to provide VHF-FM and HF coverage of the entire coast. Coast Guard Groups Monterey, San Francisco, and Humboldt Bay all have VHF phone patch capability; therefore the MSO Command Duty Officer (CDO) should be able to communicate with any vessel within range of one of the repeaters. The locations of these repeaters are listed in Figure 5000-C. By phone patch through Communications Area Master Station Pacific (CAMSPAC), located at Pt. Reyes, the MSO watch office could communicate on HF frequencies to a vessel offshore anywhere off the coast of California.

The Coast Guard Pacific Strike Team has a cache of programmable hand-held VHF-FM radios and a computer which can tune those radios to any desired frequency. The Strike Team also owns several portable repeaters which can be tuned to a desired frequency and deployed wherever necessary. It also has one portable INMARSAT (satellite telephone) system.

5321 Pacific Strike Team Command Trailer:

Pacific Strike Team also has a Communications/Mobile Command Post trailer equipped with VHF-FM radio and multiple line telephones.

5322 Transportable Communication Centers (TCC'S):

The TCC is a self-contained, rapidly deployable Coast Guard manned and maintained Communications Module. It can provide a full range of telecommunications capabilities to support a large oil spill response. Its capabilities include:

- transmissions possible in all modes of communication in HF, VHF and UHF;
- different types of antennas for best propagation and coverage in remote and uneven terrain;
- cellular telephone (secure, non-secure, and computer/data link);
- INMARSAT (satellite telephone system); and
- Weather fax direct from National Weather Service.

One TCC is located at the Coast Guard Communications Area Master Station Pacific (CAMSPAC) at Pt. Reyes, CA in a twelve hour (B-12) recall status. It can be towed by five-ton truck or airlifted in a C-130 fixed-wing aircraft. A modified van accompanies the unit if deployed by aircraft, but the van is not well suited for towing the TCC long distances. If the unit had to be deployed far from the destination airport, a five-ton truck would be required. A team of three persons (CG Electronic Technicians and Telecommunication Specialists) accompanies the unit for maintaining the operational status, the requesting unit is to provide personnel to man the TCC. The TCC can be powered by generators (which accompany the unit) or directly connected to a power source. Fuel for the generators will be supplied by the requesting unit. The power requirements for the TCC are:

Five wire, three phase power
120/208-220/380 VAC
up to 65 HZ, 42 AMPS

Adequate space is required for the set up of the TCC, approximately 200 feet by 200 feet. The antenna setup requires this space due to the power radiating from each of the transmit antennas. This is an important consideration in the decision where to locate the unit. After arrival, it will take approximately 2 hours to get the TCC on line.

The TCC is a Pacific Area controlled asset. If it is determined that the TCC is necessary for a response, requests must be made through PACAREA.

5330 OSPR Communications capabilities:

OSPR also has a system of repeaters and high sites throughout the state. At present coastal coverage is approximately 80%. However, two portable repeaters are also available to provide coverage in remote areas and provide for a local net at a spill site. OSPR vehicles and personnel throughout the state have VHF-FM radios (150-174Mhz), and OSPR has a cache of 34 handheld "pool" radios for use by other agencies or groups assisting in spill response. The OSPR Communications Manager is Mr. Brian Groves (916-324-7994).

5340 Local Government Communications

CALCORD (VHF-FM 156.075Mhz) is the primary frequency for coordination among state and local government agencies in a multi-agency response.

Local fire and emergency medical services agencies also use frequencies within the FIREScope system.

Local law enforcement agencies, county sheriffs, and the California Highway Patrol use the CLEMAR system for inter-jurisdictional coordination.

5350 Mobile Communications Staging Areas

The selected shoreside staging area for multiagency operations will be directed via land line, or on CH81A VHF-FM Coordination NET. Once a communications site has been selected, mobile communications vehicles and trailers should be located no closer than 25 feet to each other. The need for alternate or multiple staging areas and attendant communications coverage will depend on the extent of the coastal area affected by the spill.

5360 Communications Status Charts

In order for all response agencies to effectively organize communications efforts, information on communications status must be shared by all agencies at the staging area. Once mobile communications trailers are in place, and agencies have checked into CH81A, a communications status chart listing each agencies' guard requirements should be prepared and updated as situations dictate. All agencies should fill in the appropriate information on a chart similar to the Communications Status Chart. The communications status chart should also be reproduced in paper form and distributed to all other response agencies located at the staging area. Additional updates or changes in unit status may be relayed via CH81A once communication status charts have been distributed.

5370 Security Awareness

Radio communications, unless encrypted for secure transmission, are subject to electronic surveillance and monitoring by private citizens and the public media. All agencies should be security conscious before transmitting information by radio that may be considered media sensitive, proprietary, or private. Good judgement is the only rule that applies; however, public affairs representatives should be consulted for guidance in specific instances if necessary.

5500 AREA RESOURCES: RESPONSE EQUIPMENT

5510 Summary of Area Resources

This appendix provides a comprehensive listing of all equipment specifically useful for oil-spill cleanup within San Francisco Bay's COTP zone. Equipment from all three of the OPA90 planning areas within the San Francisco Bay COTP zone is included. The equipment is broken down by organizations as follows:

- 5511.01 Allied Marine Services
- 5511.02 Arco Products Company
- 5511.03 Baker Tanks
- 5511.04 Clean Pacific
- 5511.05 Clean Bay Incorporated
- 5511.06 Crescent City Harbor District
- 5511.07 District Response Advisory Team
- 5511.08 Ecology Control Industries
- 5511.09 Evergreen
- 5511.010 Exxon Benecia
- 5511.011 Foss Environmental
- 5511.012 Huntway Refining Company
- 5511.013 Martinez Refining Company
- 5511.014 MSRC
- 5511.015 Pacific Link Environmental
- 5511.016 Parker Diving Service
- 5511.017 Phillip West Industrial Services
- 5511.018 Port of Stockton
- 5511.019 Sausalito Fire Department
- 5511.020 Selby Shore Terminals
- 5511.021 Time Oil Company
- 5511.022 Tosco Avon Refinery
- 5511.023 Tosco Richmond Terminal
- 5511.024 Tosco Rodeo
- 5511.025 USCG Pacific Strike Team

Equipment is listed by owner/operator in alphabetical order.

This appendix does not provide information on generic equipment used in a response such as hand tools, bulldozers, etc. since such equipment is readily available on the commercial market and from state and local agencies. This plan does not intend to replace the yellow pages or county oil-spill contingency plans.

5510.1 Listed Companies, Addresses, Phone Numbers, and Category Type

Company	Address	City/State	Zip	Phone Number	Category
Allied marine Service, Inc	158 Greenfield Ave	San Rafael,CA	94901	(415)456-3744	Response Contractor
Arco Products Company	1306 Canal Blvd	Richmond,CA	94804	(510)236-0313	Facility
Baker Tanks	2121 Piedmont Way	Pittsburg,CA	94565	(925)439-8251	Response Contractor
Clean Bay Incorporated	2070 Commerce Ave.	Concord,CA	94520	(925)685-2800	Response Contractor
Crescent City Harbor District	101 Citizens Dock Road	Crescent City,CA	95531	(707)464-6174	Facility
Ecology Control Industries	255 Parr Blvd.	Richmond,CA	94801	(800)788-1393	Response Contractor
Evergreen	6880 Smith Ave.	Newark,CA	94560	(510)795-4400	Response Contractor
Exxon Benicia Refinery	3400 E. Second St.	Benicia,CA	94510	(707)745-7477	Facility
Foss Environmental	1605 Ferry Point	Alameda,CA	94501	(510)749-4125	Response Contractor
Huntway Refining Company	3001 Park Road	Benicia,CA	94510	(707)746-1330	Facility
IMTT	100 Cutting Blvd.	Richmond,CA	94804	(510)412-5700	Facility
Pacific Link Environmental	P.O. Box 1734	Sausalito,CA	94966	(415)331-4005	Response Contractor
USCG Pacific Strike Team	Hangar 2, Hamilton Field	Novato,CA	94949	(415)-881-3311	Federal Agency
Parker Diving Service	P.O. Box 192	Forest Knolls,CA	94933	(415)488-0537	Response Contractor
Phillip West Industrial Services	395 W. Channel Rd.	Benicia,CA	94510	(707)746-8287	Response Contractor
Port of Stockton	P.O. Box 2089	Stockton,CA	95201	(209)946-0246	Facility
San Ramon Valley Fire Protection District	1500 Bollinger Canyon Road	San Ramon,CA	94583	(925)838-6680	State/Local Agency
Sausalito Fire Department	333 Johnson St.	Sausalito,CA	94965	(415)289-4153	State/Local Agency
Time Oil Company	488 Wright Ave.	Richmond,CA	94804	(510)232-7447	Facility
Tosco Avon Refinery Avon Refinery		Martinez,CA	94553	(925)372-3115	Facility
Tosco Richmond Terminal	1300 Canal Blvd.	Richmond,CA	94804	(510)412-7606	Facility
Martinez Refining Company	3485 Pacheco Blvd.	Martinez,CA	94553	(925)313-5204	Facility
Selby Shore Terminals	90 San Pablo Ave.	Crockett,CA	94525	(925)228-3227	Facility
Clean Pacific	N/A	N/A,CA	N/A	N/A	Response Contractor
Tosco Rodeo	1380 San Pablo Ave	Rodeo,CA	94572	(510)245-4459	Facility

5512 Vessel Of Opportunity Skimming System (VOSS)

The VOSS is loaded on a 48' flatbed trailer for easy transport and can equip any suitable vessel to be a complete oil recovery platform with boom, skimmers and storage for recovered product. Sub systems can also be used individually as needed during emergency oil spill operations. If a vessel is available approximate response time for this system is 4 hours.

Located in Eureka, CA

Sub systems:

Boom:

Type	Fence
Model	American
Service	Ocean
Sections	10/50'
Length	500'
Dedicated to facility	N/A
Connector	Universal Slide Type 1
Flotation	15.5"
Skirt Length	26.5"
Transport	1/42' Trailer

Flexiboom:

Type	Fence
Model	Hyde
Service	Ocean
Sections	2/50'
Length	200'
Dedicated to facility	N/A
Connector	U-bolts
Flotation	18.5"
Skirt Length	24.5"
Transport	1/48' Trailer

Skimmers:

Type	Weir
Make/Model	DESMI/Archimedean
Dispatch time	1 hour
Number of units	2
Recovery (bbls/day)	5000
Storage	none

Barges/storage:

Type	barge
Make/model	Lancer
Dispatch time	1 hour
Number of units	2
Storage	620 bbls.

Cargo transfer pumps:

Type	submersible
Make/model	CCN 150-5C
Number of units	2
Power source	hydraulic
Fitting size	6"
Rated GPM	2000
Dispatch time	1 hour

5513 Hazardous Substance Response Equipment To Be Developed

5520 Summary of Out of Area Resources Available To Be Developed

5600 AREA RESOURCES: PERSONNEL AND SERVICES

5610 Federal Resources/Agencies

5610.1 Trustees for Natural Resources

The President is required to designate in the NCP those federal officials who are to act on behalf of the public as trustees for natural resources. These designated federal officials shall act pursuant to section 1006 of the OPA. “Natural resources” means land, fish, wildlife, biota, air, water, ground water, drinking water supplies, and other such resources belonging to, managed by, held in trust by, appertaining to, or otherwise controlled (hereinafter referred to as “managed or controlled”) by the United States, including the resources of the exclusive economic zone.

The following individuals shall be the designated trustee(s) for general categories of natural resources, including their supporting ecosystems. They are authorized to act pursuant to section 1006 of the OPA when there is injury to, destruction of, loss of, or threat to natural resources, including their supporting ecosystems as a result of a discharge of oil. Notwithstanding the other designations in this section, the Secretaries of Commerce and the Interior shall act as trustees of those resources subject to their respective management or control.

(1) The Secretary of Commerce shall act as trustee for natural resources managed or controlled by DOC and for natural resources managed or controlled by other federal agencies and that are found in, under, or using waters navigable by deep draft vessels, tidally influenced waters or waters of the contiguous zone, the exclusive economic zone, and the outer continental shelf. However, before the Secretary takes an action with respect to an affected resource under the management or control of another federal agency, he shall, whenever practicable, seek to obtain concurrence of that other federal agency. Examples of the Secretary’s trusteeship include the following natural resources and their supporting ecosystems: marine fishery resources; anadromous fish; endangered species and marine mammals; and the resources of National Marine Sanctuaries and National Estuarine Research Reserves.

(2) The Secretary of the Interior shall act as trustee for natural resources managed or controlled by DOI. Examples of the Secretary’s trusteeship include the following natural resources and their supporting ecosystems: migratory birds; anadromous fish; endangered species and marine mammals; federally owned minerals; and certain federally managed water resources. The Secretary of the Interior shall also be trustee for those natural resources for which an Indian tribe would otherwise act as trustee in those cases where the United States acts on behalf of the Indian tribe.

(3) Secretary for the land managing agency. For natural resources located on, over, or under land administered by the United States, the trustee shall be the head of the department in which the land managing agency is found. The trustees for the principal federal land managing agencies are the Secretaries of DOI, USDA, DOD, and DOE.

(4) Head of Authorized Agencies. For natural resources located within the United States but not otherwise described in this section, the trustee is the head of the federal agency or agencies authorized to manage or control those resources.

5610.1.1 Indian Tribes

The tribal chairmen (or heads of the governing bodies) of Indian tribes, as defined in section 1.5, or a person designated by the tribal officials, shall act on behalf of the Indian tribes as trustees for the natural resources, including their supporting ecosystems, belonging to, managed by, controlled by, or appertaining to such Indian tribe, or held in trust for the benefit of such Indian tribe, or belonging to a member of such Indian tribe, if such resources are subject to a trust restriction on alienation. When the tribal chairman or head of the tribal governing body designates another person as trustee, the tribal chairman or head of the tribal governing body shall notify the President of such designation.

5610.1.2 Foreign Trustees

Foreign Trustees. Pursuant to section 1006 of the OPA, foreign trustees shall act on behalf of the head of a foreign government as trustees for natural resources belonging to, managed by, controlled by, or appertaining to such foreign government.

5610.2 U.S. Coast Guard

5610.2.1 USCG National Strike Force (NSF)

The National Strike Force (NSF) was created in 1973 as a Coast Guard staffed “Special Force”. This special force assists On-Scene Coordinators (OSCs) responding to potential and actual oil and hazardous material spills as directed by the National Contingency Plan (NCP).

The NSF is composed of four units including three, 35 member Strike Teams. These teams are:

The Atlantic Strike Team located in Fort Dix, NJ **(609) 724-0008**;

The Gulf Strike Team located in Mobile, AL **(205) 639-6601**; and

The Pacific Strike Team located in Novato, CA **(415) 883-3311**.

The Strike Teams are managed by a fourth unit, the National Strike Force Coordination Center (NSFCC) located in Elizabeth City, NC **(919) 331-6000/6032. Fax (919) 331-6012/6013**

Address: **Commanding Officer
National Strike Force Coordination Center
1461 US Hwy 17 North
Elizabeth City, NC 27909**

NSF Mission: The NSF is a unique, highly trained cadre of Coast Guard professionals who maintain and rapidly deploy with specialized equipment in support of Federal On-Scene Coordinators preparing for and responding to oil and chemical incidents in order to prevent adverse impact to the public and to reduce environmental damage.

NSF capabilities include:

- Responding with trained personnel and specialized equipment to prevent, contain and/or remove spills of oil and releases of hazardous materials;
- Providing spill management expertise;
- Assisting with response planning and consultation;
- Conducting operational training in oil and chemical spill response techniques and equipment usage;
- Identifying, locating, and assisting in the transportation of specialized equipment needed for spill response; and
- Providing support from the Public Information Assist Team (PIAT) to OSCs during pollution response.

The NSF can provide OSCs with expertise in many areas, including:

- Operating spill response equipment;
- Supervising / monitoring response personnel on sites;
- Outlining, establishing, monitoring site safety requirements during the conduct of hazardous material spill/release operations;
- Providing resource and photographic documentation support;
- Providing command, control and communications support.

The NSF equipment inventory includes:

- Lightering and transfer systems - including pumping equipment capable of handling all oils, corrosives and other chemical cargoes;

- Containment barriers and skimming systems; Open Water Oil Containment and Recovery System (OWO CRS) and Vessel of Opportunity Skimming System (VOSS);
- Offshore inflatable containment boom;
- Temporary storage devices for oil and hazardous materials;
- Mobile command posts and communications equipment;
- Generators, light towers, air compressors;
- Air monitoring equipment;
- Levels A, B and C HAZMAT response entry capabilities;
- Trailerable and inflatable boats to support deployment of equipment and provide logistics;
- Photographic and video documentation equipment.

Request for Strike Team Assistance: As outlined in the NCP, “The OSC may request assistance directly from the Strike Teams. Requests for a team may be made to the Commanding Officer of the appropriate team, the USCG member of the RRT, or the Commandant of the USCG through the NRC”. OSCs are encouraged to use the NSF whenever it’s expertise or equipment is needed, or to augment the OSC’s staff when it is over burdened by a response to a given incident. The NSF should be used when:

- A medium or major discharge or potential discharge occurs;
- Control of the discharge requires the special knowledge or special equipment of the NSF;
- Response will require in excess of two days to complete removal operations and augmentation by NSF personnel will release local forces to return to normal operations; or
- In the judgment of the OSC, NSF capabilities are necessary.

Upon receiving a request, personnel and equipment will be deployed to the scene in the most expeditious manner possible. This may involve over-the-road transport: all three strike teams have tractor-trailer rigs which give them rapid deployment capabilities. In the event air transport of equipment is required, aircraft support will be coordinated by the appropriate Area Commander.

By requesting assistance from any one strike team, an OSC immediately gains access to the entire NSF personnel roster and equipment inventory. Each team maintains a state of readiness which enables them to dispatch two members immediately, four members within two hours, and up to twelve members within six hours as the circumstances of the incident dictate. Equipment would be dispatched within four hours of a request for assistance.

Note: Since response support if time critical, early notification of Strike Team assistance (or potential assistance) will allow the teams to begin logistical planning even before a formal request is made.

Logistical Considerations: Strike Teams make every effort to be as logistically independent, however, assistance may be required from the OSC in arranging the following support:

- Heavy lifting equipment, such as cranes and forklifts capable of handling a 16,000 lb. containment barrier box;
- Fork extensions for forklift;
- Small boats, vessels of opportunity;
- Electrical power, land lines for phones and computers, potable water supply and fuel supply for command posts.

5610.2.2 USCG District Response Group (DRG) and District Response Advisory Team (DRAT)

The District Response Group (DRG) is a framework within each Coast Guard district to organize district resources and assets to support USCG OSCs during response to a pollution incident. Coast Guard DRGs assist the OSC by

providing technical assistance, personnel, and equipment, including the Coast Guard's pre-positioned equipment. Each DRG consists of all Coast Guard personnel and equipment, including fire fighting equipment, within it's district, additional pre-positioned equipment, and a District Response Advisory Team (DRAT) that is available to provide support to the OCS in the event that a spill exceeds local response capabilities. The D11 DRAT, **510-437-2957/2940 pgr 510-466-0165**, is located at the Eleventh Coast Guard District Office in Alameda, CA. Address:

**Commander (Pmr)
Eleventh Coast Guard District
Bldg 50-6, Coast Guard Island
Alameda, CA 94501-5100**

5610.2.3 Public Information Assist Team (PIAT)

The Public Information Assist Team (PIAT) **(919) 331-6006/6032** is an element of the NSFCC staff which is available to assist OSCs to meet the demands for public information during a response or exercise. It's use is encouraged any time the OSC requires outside public affairs support. Requests for PIAT assistance may be made through the NSFCC or NRC.

Address: **Commanding Officer (PIAT)
National Strike Force Coordination Center
1461 US Hwy 17 North
Elizabeth City, NC 27909**

5610.2.4 USCG Reserve

In the event of a spill incident, the preference is to use local Coast Guard Personnel to the maximum extent possible. Current procedures to involuntarily activate reservists requires a Secretary of Transportation order and would likely take days or weeks. Therefore, it is assumed the reservists will be mobilized most rapidly on a voluntary basis utilizing the District Commander's authority to order not more than 10 officers and 100 enlisted ready reservists in one district for not more than 30 days (COMDTINST M1001.27A). Since these active duty orders are voluntary, the exact number of reservists available for active duty is impossible to predict. Additional reservists could be activated utilizing ADT or TEMAC orders. For immediate needs (during the first 1-2 days) local Coast Guard personnel will be requested to assist.

Further information on utilization of Coast Guard Reserve Forces can be obtained from the local Marine Safety Office, or by contacting the Eleventh Coast Guard District's Force Optimization and Training Office (fot) in Alameda at **510-437-2781**.

The following number of reserve forces are assigned to each MSO (As of July 1999):

MSO SD: Enlisted = **39**; Officer = **14**
MSO LA/LB*: Enlisted = **55**; Officer = **18**
MSO SFB: Enlisted = **47**; Officer = **10**
MSD Concord: Enlisted = **8**; Officer = **2**
*Includes MSD Santa Barbara

5610.2.5 USCG Auxiliary

The Coast Guard Auxiliary is a voluntary organization which supports Coast Guard operations and may be utilized in the event of a spill incident. The Auxiliary flotillas are organized under the Group Commander and can be requested to assist the Incident Commander through the Group Commander. The group contact numbers within the Eleventh Coast Guard District are as follows:

CG Group San Francisco:	415-399-3417/3530
CG Group Los Angeles/Long Beach:	562-980-4444
CG Activities San Diego:	619-683-6470

Additional information regarding the employment of the Coast Guard Auxiliary in support of the Marine Environmental Protection Program can be obtained by contacting COMDT G-OCX at **202-267-1001**.

5610.3 National Oceanic and Atmospheric Administration (NOAA)

5610.3.1 Scientific Support Coordinator

The NOAA SSC D11 can be reached at **(510) 437-5344 or (800) 759-8888 PIN 579-8818**
NOAA HAZMAT Seattle **206-526-6317**

NOAA Scientific Support Coordinators (SSCs) are the principal advisor to the USCG OSC for scientific issues, communication with the scientific community, and coordination of requests for assistance from State and Federal agencies regarding scientific studies. The SSC leads a scientific team and strives for a consensus on scientific issues affecting the response but ensures that differing opinions within the community are communicated to the OSC. The SSC can also assist the OSC with information relating to spill movements and trajectories. The NOAA SSC serves as the OSC's liaison between damage assessment data collection efforts and data collected in support of response operations. The SSC leads the synthesis and integration of environmental information required for spill response decisions in support of the OSC, coordinating with State representatives, appropriate trustees and other knowledgeable local representatives.

Address: **NOAA SSC**
Bldg 50-5 Coast Guard Island
Alameda, CA 94501-5100

5610.3.2 Spill/Discharge Trajectory Modeling

The Trajectory Analysis Team develops estimates that combine visual spill observations made from aircraft overflights or remote sensing platforms with computer model calculations that include observed, predicted, and statistical information on weather and ocean currents. Integrating and interpreting data from field observations and computer models, allows the Team to provide complex information in a form the On-Scene Coordinator can use. For hazardous materials spills, projections can be made for the pollutants' movement in water and air.

The Team gives the Scientific Support Coordinator information on a spill's projected movement and behavior in the water or air. There are often two or more team members at each spill scene: one team member is responsible for participating in aircraft overflights of the actual spill scene and for briefing the SSC, the Coast Guard, and other operational personnel on the slick movement. Overflights by trained observers provide critical information to decision-makers about the location, quantity, and changes in the oil. The information also serves to verify and update data in trajectory models, which use statistical averages until actual observations are available. During these overflights, the Team member will direct the pilot's flight track and aircraft flight elevation in order to best measure the course of the spill in the water. This person often may deploy oil-tracking instrumentation, such as drogues or dye pills to mark the path of the pollutant and look for visual confirmation of the spill's movement and behavior.

The other on-scene Trajectory Analysis Team member usually works out of the on-scene command post. This Team member is responsible for interfacing with the "home team," the Seattle-based component of the Team that provides data from the spill model and literature searches to the on-scene team. The spill model uses information on the location and time of the spill and its rate of release, area tides, currents, any unique circulation features, both observed and forecasted weather conditions, and the pollutant's composition. The model takes this information and generates maps that graphically estimate the expected movement of the spill. The command post member analyzes data received from the home team and consults local experts on the physical and chemical properties of the oil and on the particular oceanography of the area to help them make informed, accurate recommendations.

Collectively, the Trajectory Analysis Team has about seventy-five years of experience in dealing with spills and their fate in the marine environment. (NOAA Scientific Support Team Reference Guide)

5610.3.3 Oceanic & Atmospheric Modeling

Contact NOAA SSC for required/appropriate modeling provided by NOAA.

5610.4 U.S. Navy Supervisor Salvage (SUPSALV)

U.S. Navy Supervisor of Salvage (SUPSALV): **(703) 607-2758 or 602-8206** The U.S. Navy (USN) is the Federal agency most knowledgeable and experienced in ship salvage, shipboard damage control, and diving. The USN has an extensive array of specialized equipment and personnel available for use in these areas as well as specialized containment, collection, and removal equipment specifically designed for salvage related and open sea pollution incidents.

SUPSALV can provide salvage expertise and maintains a warehouse on each coast stockpiled with salvage and response gear. (See NSFCC Spill Response Resource Inventory <SRRI> for a listing of SUPSALV equipment). Individual Navy facilities also locally stockpile some response equipment, which is already listed in the SRRI.

SUPSALV pollution response inventory can also be accessed through the following Internet website:

<http://www.navsea.navy.mil/sea00c/p equip.html>

5610.5 EPA Emergency Response Teams

EPA Emergency Response Team (ERT) **(732) 321-6740 or (732) 321-6660 (24hr)** has expertise in treatment technology, biology, chemistry, hydrology, geology, and engineering. The ERT can provide the OSC access to special equipment to deal with chemical releases, and can provide the OSC with advice concerning hazard evaluation, multimedia sampling and analysis, risk assessment, on-site safety, cleanup techniques, water supply decontamination and protection, use of dispersants, environmental assessment, degree of cleanup required, and the disposal of contaminated materials. The ERT also offers various training courses to prepare response personnel.

Address: **Environmental Response Team
U.S. Environmental Protection Agency
Edison, NJ 08817**

5610.6 Agency for Toxic Substance and Diseases (ATSDR)

The Agency for Toxic Substances and Disease Registry (ATSDR) **(415) 744-2194/Fax 744-1797 or (404) 639-0615 (24hr)** maintains appropriate disease/exposure registries, provides medical care and testing of individual during public health emergencies, develops, maintains, and informs the public concerning the effects of toxic substances, maintains a list of restricted or closed areas due to contamination, conducts research examining the relationship between exposure and illness, and conducts health assessments at contaminated sites. The ATSDR also assists the EPA in identifying most hazardous substances at CERCLA sites, develops guidelines for toxicological profiles of hazardous substances, and develops educational materials related to the health effects of toxic substances. ATSDR resources are an important tool for the OSC to use in assessing the possible effects of an emergency on the public's health.

Address: **ATSDR Region IX, Rm 9261
75 Hawthorne St. MS: (H-1-2)
San Francisco, CA 94105**

5610.7 U. S. Department of Energy

The DOE generally provides designated OSCs that are responsible for taking all response actions with respect to releases where either the release is on, or the sole source of the release is from, any facility or vessel under its jurisdiction, custody, or control, including vessels bareboat-chartered and operated. In addition, under the FRERP, DOE provides advice and assistance to other OSCs/RPMs for emergency actions essential for the control of

immediate radiological hazards. Incidents that qualify for DOE radiologic I advice and assistance are those believed to involve source, by-product, or special I nuclear material or other ionizing radiation sources, including radium, and other naturally occurring radionuclides, as well as particle accelerators. Assistance is available through direct contact with the appropriate DOE Radiological Assistance Program Regional Office.

5610.7.1 Nuclear Regulatory Commission (301) 816-5100 24 hr

Notify of any incident involving radiological material; Federally designated OSC.

5610.8 Federal Emergency Management Agency (415) 923-7250

FEMA provides guidance, policy and program advice, and technical assistance in hazardous materials, chemical, and radiological emergency preparedness activities (including planning, training, and exercising). FEMA's primary point of contact for administering financial and technical assistance to state and local governments to support their efforts to develop and maintain an effective emergency management and response capability is the Preparedness, Training, and Exercises Directorate. Notified of any incident that could result in large scale evacuation or relocation of people.

Address: **600 Harrison St. #515**
San Francisco, CA 94107-1376

5610.9 U. S. Department of the Interior

The DOI may be contacted through Regional Environmental Officers, who are the designated members of RRTS. Department land managers have jurisdiction over the national park system, national wildlife refuges and fish hatcheries, the public lands, and certain water projects in western states. In addition, bureaus and offices have relevant expertise as follows:

- (a) United States Fish and Wildlife Service and other Bureaus: Anadromous and certain other fishes and wildlife, including endangered and threatened species, migratory birds, and certain marine mammals; waters and wetlands; and effects on natural resources.
- (b) The National Biological Survey performs research in support of biological resource management; inventories, monitors, and reports on the status and trends in the Nation's biotic resources; and transfers the information gained in research and monitoring to resource managers and others concerned with the care, use, and conservation of the Nation's natural resources. The National Biological Survey has laboratory/research facilities.
- (c) Geological Survey: Geology, hydrology (ground water and surface water), and natural hazards.
- (d) Bureau of Land Management: Minerals, soils, vegetation, wildlife, habitat, archaeology, and wilderness.
- (e) *Minerals Management Service: Oversight of offshore oil and gas exploration and production facilities and associated pipeline facilities under the Outer Continental Shelf Lands Act and the CWA; oil spill response technology research; and establishing oil discharge contingency planning requirements for offshore facilities.
- (f) Bureau of Mines: Analysis and identification of inorganic hazardous substances and technical expertise in metals and metallurgy relevant to site cleanup.
- (g) Office of Surface Mining: Coal mine wastes and land reclamation.
- (h) *National Park Service: General biological, natural, and cultural resource managers to evaluate, measure, monitor, and contain threats to park system lands and resources; archaeological and historical expertise in protection, preservation, evaluation, impact mitigation, and restoration of cultural resources; emergency personnel.
- (i) Bureau of Reclamation: Operation and maintenance of water projects in the West; engineering and hydrology; and reservoirs.
- (j) Bureau of Indian Affairs: Coordination of activities affecting Indian lands; assistance in identifying Indian tribal government officials.
- (k) Office of Territorial Affairs: Assistance in implementing the NCP in American Samoa, Guam, the Pacific Island Governments, the Northern Mariana Islands, and the Virgin Islands.

5610.9.1 National Park Service (415) 561-5505/561-5510

Notify of any discharge which has impacted or threatens to impact national park lands (See DFG Pollution Response Manual).

5610.9.2 Minerals Management Service (805) 389-7550 24 hr

Notify during any incidents which may involve the offshore drilling industry.

5610.10 U.S. Department of Justice
455 Golden Gate Ave #11000
San Francisco, CA 94102-3664
(415) 703-5523

Contact for possible federal legal or law enforcement issues.

5620 State Resources/Agencies

Government Official Liaisons

State law identifies the Administrator of the Department of Fish and Game's Office of Oil Spill Prevention and Response (OSPR) as the State coordinator for marine oil spills and serves as the liaison to the Governor's Office and other State agencies, including the coordination of all State resources.

Trustees for Natural Resources

The California Department of Fish and Game are trustees for the living natural resources of the State of California. The California State Lands Commission is a resource trustee for the State-owned land beneath navigable waters of the State. The California Department of Parks and Recreation is a resource trustee for resources present on property owned by that Department of parks and Recreation.

State Emergency Response Committees

The State Interagency Oil Spill Committee (SIOSC) was created by the Lempert-Keene-Seastrand Oil Spill Prevention and Response Act and, among other responsibilities, is charged with the responsibility of creating and updating a list of resources and special forces available to them in the event of a significant spill. The agencies listed below are members of the SIOSC that are likely to have resources that can be useful in response efforts. Contacts persons are identified below.

Fax: (213) 897-2802

State Environmental Agencies-

In addition to the environmental agencies listed in 5623 above, the Resources Agency is a member of the SIOSC.

Law Enforcement Agencies

Several members of the SIOSC have law enforcement authority, including the California Highway Patrol, the California Department of Fish and Game, the California Department of Parks and Recreation, the State Fire Marshal.

Hazardous Materials Response Teams

Although a few State agencies have teams that are capable of doing site assessment at oil and hazardous materials spills, the only State agency with true hazardous materials response team is the Department of Toxic Substances RAPID team. The likelihood of them being routinely deployed for marine spills of hazardous materials is believed to be low, however. Their main focus is on spills of hazardous materials from railroad mishaps.

Fields of Testing: Organic chemistry

Anametrix Inc. - #1234 408-432-8192
1961 Concourse Drive, Suite E
San Jose, CA 95131
Fields of Testing: Physical property tests, inorganic chemistry, extraction tests, organics by GC/MS, org. chem.

Anresco - #1523 415-822-1100
1370 Van Dyke Drive
San Francisco, CA 94124
Fields of Testing: Physical property tests, inorganic chemistry, extraction tests, organic chemistry

Applied Retion Environmental Lab - #1602 408-453-0188
1445 Koll Circle, Suite 109
San Jose, CA 95112
Fields of Testing: Organic chemistry

Bace Analytical & Field Serv Inc./Mobile - #1264 707-838-3027
930 Shiloh Road, Bldg. 4A
Windsor, CA 95492
Alternate #: 800-834-3353
Fields of Testing: Organic chemistry

BRELJE and RQCE Inc. - #1243 707-544-8807
425 South E Street
Santa Rosa, CA 95404
Fields of Testing: Physical property tests, inorganic chemistry, extraction tests, aquatic toxicity bioassay

Calcoast Analytical Laboratory - #1236 510-652-2979
4072 Watts Street
Emeryville, CA 94608
Fields of Testing: Physical property tests, inorganic chemistry, extraction tests, organics by GC/MS, org. chem.

California Dept. of Health Services, Labs Division 510-540-2800
2151 Berkeley Way
Berkeley, CA 94704-1011

California Dept. of Toxic Subs Control 510-540-2048
2151 Berkeley Way
Berkeley, CA 94704-1011

Laboratories - SFB&D (Cont'd)

Caltest Analytical Lab Environmental Services - #360 1885 North Kelly Road Napa, CA 94558 Fields of Testing: Physical property tests, inorganic chemistry, extraction tests, organics by GC/MS, org. chem.	707-258-4000
CGS Analytical laboratory, #1189 3479 Edison Way Fremont, CA 94538 Fields of Testing: Inorganic chemistry	510-745-8426
Chevron USA Inc. - Quality Control Division - #E702 481 Chevron Way Richmond, CA 94802 Fields of Testing: Physical property tests, inorganic chemistry, extraction tests, GC analysis, org. chem, bioassay	510-242-2172
Chevron Environ. Lab - Chevron Chemical Co., #118 940 Hensley Street Richmond, CA 94804 Fields of Testing: Physical property tests, inorganic chemistry, extraction tests, rganics by GC/MS, org. chem.	510-242-8378
Coast to Coast Analytical Serv, #1204 2059 Junciton Avenue San Jose, CA 95131 Fields of Testing: Phisical property tests, inorganic chemistry, extraction tests, organics by GC/MS, org. chem.	408-955-9077
Coast to Coast Analytical Srv/Mobile 1, #1322 6006 Egret Court Benicia, CA 94510 Fields of Testing: Physical property tests, inorganic chemistry, extraction tests, organics by GC/MS, org. chem.	707-747-2757
Columbia Analysis Svcs. Inc. - #1426 S J Environ. Svcs. 1921 Ringwood Avenue San Jose, CA 95131 Fields of Testing: Physical property tests, inorganic chemistry, extraction tests, organics by GC/MS, org. chem.	408-748-9700
Curtis & Tompkins Ltd. Analytical Labs #1459 2323 5th Street Berkeley, CA 94710 Fields of Testing: Physical property tests, inorganic chemistry, extraction tests, organics by GC/MS, org. chem.	510-486-0900
D & M , Mobiveh Lic #4B79390 - #1528 3700 Lakeville Highway Petaluma, CA 94954 Fields of Testing: Organic chemistry	707-763-8245
D & M Labs, Division of Dames and Moore - #1300 3700 Lakeville Highway Petaluma, CA 94954 Fields of Testing: Physical property tests, inorganic chemistry, extraction tests, organics by GC/MS, org. chem.	707-763-8245

Laboratories - SFB&D (Cont'd)

Ebmud Laboratory Services Division, #E660 510-287-1435
2020 Wake Ave. (1/4 Mi E. Oakland Army Base)
Oakland, CA 94607
Fields of Testing: Inorganic chemistry, extraction tests, organics by GC/MS, org. chem., toxicity testing, phys. tests

Enseco - California Analytical Lab #E 771 916-374-4300
2544 Industrial Boulevard
West Sacramento, CA 95691
Fields of Testing: Physical property tests, inorganic chem., extraction tests, organics by GC/MS, org. chem.

ETC/Mid-Pacific Environmental Laboratory - #1206 650-964-0844
625 B Clyde Avenue
Mountain View, CA 94043
Fields of Testing: Inorganic chemistry, extraction tests, organics by GC/MS, organic chemistry

Eureka Inc. - #1165 916-381-7953
6790 Florin Perkins Road
Sacramento, CA 95828
Fields of Testing: Physical property tests, inorganic chemistry, extraction tests, organics by GC/MS, org. chem.

Eureka Labs Inc./Mobil Lab Srv. Div., #1304 916-381-7953
6790 Florin Perkins Road
Sacramento, CA 95828
Fields of Testing: Organic chemistry

FGL Environmental - Stockton, #1563 209-942-0181
2500 Stagecoach Road
Stockton, CA 95215
Fields of Testing: Inorganic chemistry, extraction tests, organics by GC/MS, organic chemistry

FMC Corp. - Corp. Tech Ctr., Material Eng Lab #E716 408-289-2242
1205 Coleman Avenue
Santa Clara, CA 95052
Fields of Testing: Physical property tests, inorganic chemistry, extraciton tests

Forensic Analytical Specialties, #1202 510-887-8828
3777 Depot Road, Suite 406-409
Hayward, CA 94545
Fields of Testing: Inorganic chemistry, extraction tests, asbestos

I.T. Corp San Jose, Analytical Service - #1408 562-476-1290
17605 Fabrica Way
Cerritos, CA 90701
Fields of Testing: Physical property tests, inorganic chemistry, extraction tests, orgasnics by GC/MS, org. chem.

I.T. Corp/Mobile Veh. Lic. #3V42113, #1564 925-372-9100
4585 Pacheco Blvd.
Martinez, CA 94553
Fields of Testing: Inorganic chemistry, organic chemistry

Laboratories - SFB&D (Cont'd)

IBM San Jose Enviro & Industrial Lab - #1290 - Storage 5600 Cottle Road, Bldg. 110 San Jose, CA 95193 Fields of Testing: Physical property tests, inorganic chemistry, org. chem. Alternate #: 408-256-2047 (Lab Mgr.)	408-256-2555
Matrix Environmental Inc. - #359 3017 Kilgore Road #100 Rancho Cordova, CA 95742 Fields of Testing: Inorganic chemistry, organic chemistry, organics by GC/MS, physical property tests	916-635-3962
MBT Environmental 3083 Gold Canal Drive Rancho Cordova, CA 95670 Fields of Testing: Full scale organic and inorganic analysis	916-638-3696
McIntosh Laboratories Inc. 2292 Trade Zone Boulevard San Jose, CA 95131-1801 Fields of Testing: Inorganic chemistry, extraction tests	408-946-3935
Mobile Chem Lab Inc, #1223 Stationary (#MX2172) 5011 Blum Road, Suite 1 Martinez, CA 94533 Fields of Testing: Organic chemistry	510-372-3700
Mobile Chem Lab Inc./Mobile #1, #1342 Central Valley 5021 Blum Road, Suite 3 Martinez, CA 94533 Fields of Testing: Inorganic chemistry	510-372-3700
Mobile Chem Lab Inc./Mobile #2, #1428 Vehicle License 5021 Blum Road, Suite 3 Martinez, CA 94533 Fields of Testing: Organic chemistry	925-372-3700
Mobile Chem Lab Inc./Mobile #2MUZ466, #358 5021 Blum, Suite 3 Martinez, CA 94533 Fields of Testing: Inorganic chemistry, organic chemistry	925-372-3700
Morse Inc. - #E 728 1525 Fulton Ave. Sacramento, CA 95825	916-481-3141
Nachtmann Analytical Laboratory - #1419 720 Olive Drive Davis, CA 95161 Fields of Testing: Physical property tests, inorganic chemistry, extraction tests, organic chemistry	530-758-5850

Laboratories - SFB&D (Cont'd)

Net Pacific Inc./Santa Rosa Stationary - #1386 707-526-7200
435 Tesconi Circle
Santa Rosa, CA 95401
Fields of Testing: Physical property tests, inorganic chemistry, extraction tests, organics by GC/MS, org. chem.

Pace Inc. - Novato, #1282 415-883-6100
11 Digital Drive
Novato, CA 94949
Fields of Testing: Physical property tests, inorganic chemistry, extraction tests, organics by GC/MS, org. chem.

Pace Laboratory, #361 415-883-6100
11 Digital Drive
Novato, CA 94949
Fields of Testing: Organic chemistry. Mobile lab available from another pace office, if required.

Pacific Chemical Lab, Inc. 800-821-0050
501 Army Street
San Francisco, CA 94124
Fields of Testing: Marine chemist
Alternate #: 415-821-2201

Rhone - Poulenc Basic Chemicals, #1278 925-228-5530
100 Mococo Road
Martinez, CA 94553
Fields of Testing: Physical property tests, inorganic chemistry, extraction tests, organic chemistry

Scientific Environmental Laboratory, Inc. - #1606 650-856-6011
924 Industrial Avenue
Palo Alto, CA 94303
Fields of Testing: Physical property tests, inorganic chemistry, extraction tests organics by GC/MS, org. chem.

Sequoia Analysis Lab Inc/Mobile K#1 - #1229 Veh Lic 925-686-9600
1900 Bates Ave., Suite L
Concord, CA 94520
Fields of Testing: Organic chemistry

Sequoia Analytical Lab - #1210 650-364-9600
680 Chesapeake Drive
Redwood City, CA 94063
Fields of Testing: Physical property tests, inorganic chemistry, extraction tests, organics by GC/MS, org. chem.

Sequoia Analytical Lab Inc., #1271 510-686-9600
1900 Bates Avenue, Suite LM
Concord, CA 94520
Fields of Testing: Inorganic chemistry, organics by GC/MS, organic chemistry, extraction tests, bioassay

Sequoia Analytical Lab Inc. - Sacto.- #1624 916-921-9600
819 West Striker Avenue, Suite 8
Sacramento, CA 95834
Fields of Testing: Inorganic chemistry, extraction tests, organic chemistry

Laboratories - SFB&D (Cont'd)

Solvent Service inc. - #1495 408-453-6046
1040 Commercial Street, Suite 101
San Jose, CA 95112
Fields of Testing: Physical property tests, inorganic chemistry, extraction tests, organic chemistry

Sparger Tech. Analytical Lab & Mobile Lab, #1614 916-362-8947
3100 Fite Circle, Suite 108
Sacramento, CA 95827
Fields of Testing: Organic chemistry, inorganic chemistry, extraction tests, DBE.

U.S. Air Force - McClellan AFB/MAT Proc. Lab, #1319 916-643-6041
Watt Avenue
North Highlands, CA 95652-5990
Fields of Testing: Physical property tests, inorganic chemistry, extraction tests, organic chemistry

Western Enviro. Sci & Tech Stationary - #1346 530-753-9500
1046 Olive Drive, Suite 3
Davis, CA 95616
Fields of Testing: Physical property tests, inorganic chem., extraction tests, organics by GC/MS, organic chem.

Zenaca Ag. Products-West. Research Ctr. #1516 510-231-1000
1200 South 47th Street
Richmond, CA 94804
Fields of Testing: Physical property tests, inorganic chemistry, extraction tests, organic chemistry
